GM
DUMP BODIES
The Knapheide Dump Body is where style, versatility and durability come together. When landscape or general contractors need a productive dump body that will last a lifetime, they choose the Knapheide Dump Body every time.

Our Dump Bodies are available in 9’6” to 11’6” lengths and side heights of 12” or 16” to accommodate 2-1/2 to 4 cubic yard carrying capacity. Models are offered with either stacked crossmembers or crossmemberless understructures and rigid or drop sides.

Select from a variety of options to make your Dump Body a perfect fit.
STANDARD FEATURES

A Sides and tailgate feature self-cleaning sloped top rails and lower rails

B Sides are constructed of 12-gauge high tensile steel

C 2x6 side board pockets on the sides at the front and rear allow for increased load capacity

D Versatile, double acting tailgate in order to accommodate both drop-down and pick-up style and spreader applications

E Quick release, one-handed lever for easy drop-down action on the tailgate

F Toe saver brackets located on both sides of the end rail for operator safety

G Rear corner posts equipped with a hook on each side for an optional tarp

H Quarter cab protector constructed of 10-gauge high tensile steel with a punched window for visibility

Other features not shown:

- Double panel tailgate construction with 12-gauge HY50 outer panel and 10-gauge HY50 inner panel

- Crossmemberless models (shown in photo) feature fully boxed long sills constructed of 7-gauge HRCQ steel and run the entire length of the floor // Stacked crossmember models feature 3” structural steel cross sills with 6” structural long sills

- Crossmemberless models feature two-piece 7-gauge HRCQ steel floor with full seam weld down the center // Stacked crossmember models feature two-piece 10-gauge HRCQ steel floor with full seam weld down the center

- Electrodeposition prime-paint system provides superior corrosion paint resistance

- Bodies are fully protected with Knapheide’s water-based undercoat

// CROSSMEMBERLESS UNDERSTRUCTURE

// STACKED CROSSMEMBER UNDERSTRUCTURE

// SUBFRAME HOISTS

- ED models are powered by a 12-volt pump with a pendant switch control
- DC models are powered by a PTO direct mount pump with push/pull control cables
- Double acting hoist provides power up and down
- Rugged steel lift arm construction provides stable lifting with smooth movement up and down

COMMITMENT TO CORROSION RESISTANCE

Corrosion won’t be a concern when you buy quality Knapheide products. To give you the best corrosion protection, we utilize a state-of-the-art, custom-designed, 12-step, SST cathodic electrodeposition finishing system, called “E-Coat.”

It bonds prime paint to steel by an electroplating process to give you a superior coat of primer, resulting in better corrosion protection compared to spraying methods.

This system allows us to create products with the highest level of corrosion resistance available.
If you are going to be a leader, it takes more than building a high-quality product. It means never being totally satisfied with that product, no matter how high quality it may be. It requires constant vigilance and a willingness to take a chance on something new. And it means exceeding expectations every time. As the industry changes, one thing never will—our commitment to making customers like you as productive and efficient as possible. We know you don’t settle, and we don’t either. That’s why we want you never to settle for anything less than Knapheide on the back of your truck.

Knapheide. Never settle.

THREE-YEAR, LIMITED WARRANTY
